Action Deferred—ON PROPOSED ORDINANCE FOR REVISION OF REGULATIONS GOVERNING VENTILATION REQUIREMENTS.

The Committee on Buildings and Zoning submitted

the following report, which was, on motion of Alderman Ronan, *Deferred* and ordered published:

CHICAGO, April 30, 1964.

To the President and Members of the City Council:

Your Committee on Buildings and Zoning, having had under consideration a list of proposed amendments to the Ventilating Code of the City of Chicago recommended by the Chicago Association of Consulting Engineers (referred to Your Committee on November 15, 1963), begs leave to recommend that Your Honorable Body pass the proposed ordinance transmitted herewith.

This recommendation was concurred in by 11 members of the committee, with no dissenting vote.

Respectfully submitted,

(Signed) DANIEL J. RONAN,
Chairman.

The following is the proposed ordinance recommended in the foregoing committee report:

Be It Ordained by the City Council of the City of Chicago:

Section 1. Chapter 81 of the Municipal Code of Chicago is amended as follows:

81-5 By striking out the second paragraph under the heading *Auxiliary Ventilating Openings* and substituting therefor the following:

In addition to windows, skylights and transoms; relief openings (R.O.) as used in section 81-7, Table A, shall be construed to be any duct that connects a room to the out-of-doors. Relief openings (R.O.) for exhaust shall terminate above the roof. Relief openings (R.O.) duct-work shall be of sufficient cross-sectional area so that maximum velocity shall not exceed 800 feet per minute. (R.O.) ducts for exhaust, may extend in a horizontal direction for a distance not to exceed 5′-0″. The quantities of air supplied or exhausted through relief openings (R.O.) shall not be less than the air quantities specified in section 81-7 for mechanical supply or mechanical exhaust. The termination of the duct shall be equipped with a storm-proof louver, cowl, or other equipment opening having an outlet free area not smaller than that of the duct.

81-7 Table A. By striking out the second line under the classification "reading rooms" and substituting therefor the following:

5 S1.2 and E0.6 or S1.2 and R.O.

By striking out all of Note 7 and substituting therefor the following:

Note 7. Cabinet spray booths. Process exhaust for any given area, containing such equipment as spray booths, grinder exhaust, shaving exhaust, etc., for which the exhaust requirements do not exceed 5000 C.F.M., indirect air supply to the area by infiltration shall be permitted, provided that the maximum volume of air exhausted does not exceed the equivalent of 1½ air changes per hour within the area.

81-15 By striking out paragraph (b) and substituting therefor the following:

In public kitchens and serving pantries, it may be obtained through ventilating openings in each of said rooms, from dining rooms adjacent to designated rooms, provided the area of the ventilating openings in the dining room is not less than five percent of the combined floor area of the dining room and the kitchen or serving pantry. When the dining room is provided with a mechanical supply system of ventilation, air from the dining room can be taken through proper openings into the kitchen and exhausted from the kitchen; such air shall be considered as exhaust from the dining room and as supply air into the kitchen; the kitchen exhaust system need not be increased beyond the requirements for kitchen exhaust as indicated in Table "A" of Ventilating Requirements; if the amount of air exhausted from the dining room through the kitchen is not sufficient to provide exhaust as indicated on Table "A" of Ventilating Requirements for the Dining Room, additional exhaust shall be taken from the dining room area to make up such requirement, either by increasing exhaust from kitchen or by installing separate additional mechanical exhaust system.

By striking out paragraph (e) and substituting therefor the following:

Except in classrooms, in rooms with mechanical supply, air may be exhausted through general offices as provided in section 81-20 and through direct openings or horizontal ducts not to exceed more than 5′-0″ in length to corridors or other uninhabited rooms, provided the room being supplied does not contain dangerous or noxious fumes, odor or dust; and provided that there are adequate R.O. or mechanical exhaust in such corridors or uninhabited rooms.

By adding after paragraph (e) the following new paragraph (f):

(f) In all garage ventilation requirements, Table "A" of Section 81-7 used for the active storage of cars only, R.O. may be located in openings in walls, areaways or roofs. The air supply required in garages of five (5) cars or more used for active storage of cars only, may be unheated.

Section 2. This ordinance shall become effective upon its passage and due publication.

Action Deferred—ON PROPOSED ORDINANCE TO PRESCRIBE REGULATIONS GOVERNING DIRECT-GAS-FIRED MAKEUP-AIR HEATERS.

The Committee on Buildings and Zoning submitted the following report, which was, on motion of Alderman Ronan, *Deferred* and ordered published:

CHICAGO, April 30, 1964.

To the President and Members of the City Council:

Your Committee on Buildings and Zoning, having had under consideration a proposed ordinance (referred to Your Committee on November 15, 1963) to amend various Sections of the Municipal Code of Chicago relating to direct-gas-fired makeup-air heaters, begs leave to recommend that Your Honor-

able Body pass the proposed *substitute* ordinance transmitted herewith.

This recommendation was concurred in by 11 members of the committee, with no dissenting vote.

Respectfully submitted
(Signed) DANIEL J. RONAN,
Chairman.

The following is the proposed substitute ordinance recommended in the foregoing committee report:

Be It Ordained by the City Council of the City of Chicago:

Section 1. The Municipal Code of Chicago is amended by inserting, in proper numerical position, the following new sections:

§60-94.1 Makeup-air heater.) No direct-gas-fired makeup-air heater may be located in any hazardous use room, nor may the discharge from a direct-gas-fired makeup-air heater be directed into a hazardous use room unless the unit shall be designed to insure that flow velocity at the outlet of the unit can never fall below 200 feet per minute, in order that there can be no possibility of backflow of air from the room.

§81-13.1 Direct-gas-fired makeup-air heaters.) A makeup-air heater is defined as a heater used to temper air supplied to only an industrial unit, as defined in §48.8 of this code, to correct negative pressures caused by exhaust systems. Such a unit is not intended to supply any of the ventilating requirements set forth in section 81-7 or any of the regular heating requirements of the area into which it discharges; separate space heating equipment must be available for this purpose. A direct-gas-fired makeup-air heater is defined as a makeup-air heater in which all the heat and products of combustion generated by the gas burning device are released into the air stream being heated. Each manufacturer of a direct-gas-fired makeup-air heater (hereinafter referred to in this §81-13.1 as the "unit") shall submit test-data, results and catalogs, certified by a registered professional engineer, to the commissioner of buildings for acceptance for use in the City of Chicago. No unit shall be accepted unless it complies with the following requirements:

(1) Performance:

(a) The unit shall be capable of maintaining the required 70°F minimum discharge air temperature, irrespective of the outside air temperature, down to –10°F.

(b) The heated air when delivered from the unit shall contain, at the point of discharge, not more than twenty-five parts per million of carbon monoxide, not more than twenty-five hundred parts per million of carbon dioxide, and no other contaminants in quantities that would create a health hazard to the occupants of the building.

(c) The unit shall meet these standards under each of the following conditions:

With maximum rated air flow of the unit and maximum rated burner input;

With maximum temperature rise of 110°F and with makeup-air throttled to one-half of the rated air flow or one-half the minimum rated air flow if the unit automatically modulates or varies the volume of makeup-air flow, to represent severe fouling of the air filters; and

If the combustion system utilizes a pre-mixed gas-air mixture, under normal air flow conditions but with the pre-mixed combustion air reduced to the minimum value which the flame supervision equipment shall permit.

(2) Makeup-air supply:

(a) The unit shall use one hundred percent outside air for the air to be heated.

(b) The intake velocity at the face of the outside air opening shall be less than 600 feet per minute.

(c) All air before passing through or over burners shall be filtered to prevent leaves, papers or other objects from being picked up from the outside, ignited and discharged.

(d) The connection between the outside air intake and the unit shall be in a straight line. If this is not possible, proper turning vanes shall be used so that the air is evenly distributed across the face of the combustion area and to prevent stratification.

(3) Combustion system and controls:

(a) The system must be purged with three or more air changes in the unit and connecting ducts before the pilot can be ignited or main burner valve is allowed to open. The fuel supply shall shut off in the event that flow velocity at the outlet of the unit shall fall below 200 feet per minute.

(b) There shall be a thermostatic device for normal operation of the gas burner component. Controls shall also be provided to limit maximum and minimum air temperatures. A low temperature limit control in the discharge air stream shall sound an alarm in the event the discharge air temperature falls below fifty degrees F. A high temperature limit control shall shut off all burners in the event the discharge air temperature rises above 100°F, and the system must require a manual resetting and purging to start.

(c) The gas burner and combustion system shall be a modulating type that will operate automatically through a turndown ratio from maximum to minimum firing rate of not less than ten to one.

(d) All burners must be positively ignited. No runners or flash tubes will be permitted for burner ignition. At normal full air flow the ignition system shall provide for smooth and quick flame ignition.

(e) All burners must be equipped with a flame safety device to insure flame existence. Flame safety controls shall be used which will shut off the fuel supply within four seconds in case of flame failure. Flame safety controls must be of the type that shut the burner system off in the event of internal malfunction of the controls.

(f) Safety devices shall be used to shut off the pilot and main burners in case of any of the following:

failure of gas/air mixture supply;

excessively high or low gas pressure;

instrument or control air pressure failure (when part of unit);

electrical power failure;

reduction of makeup-air flow through unit of more than fifty percent; or

reduction of flow velocity at the outlet of the unit below 200 feet per minute.

(4) Design:

(a) There shall be provision for operation without heating for summer ventilation.

(b) The design and construction of the direct-gas-fired makeup-air heater shall include:

Sight glasses or ports, so the burner can be viewed while making adjustments.

Access doors, so that the entire burner is accessible for cleaning or removal.

(c) The unit shall be rated as to its capacity in cubic feet per minute of air raised 100 degrees F. in temperature at a given Btu input to the burners. Each unit shall deliver the manufacturer's rating at the established air temperature rise and Btu input.

(d) The basic design of the unit shall be such that design air flow rates through or over the burner flames shall not adversely affect the combustion of the gas at the burner heads.

§81-20.1 Operational requirements — direct-gas-fired makeup-air heaters.) When installed, a direct-gas-fired makeup-air heater shall comply with the following requirements, in addition to all other requirements for mechanical ventilation equipment and in addition to the requirements for direct-gas-fired makeup-air heaters (hereinafter in this §81-20.1 referred to as the "unit") imposed under §81-13.1:

(1) Design:

(a) The total discharge of makeup-air by the unit shall be not less than 10,000 cfm, but shall not exceed 110 percent of the capacity of the exhaust system in conjunction with which it is used.

(b) The unit shall be so controlled by electrical interlocking devices that it will operate only when the mechanical exhaust system is in operation and all access doors on the air suction side of the unit are tightly closed.

(c) The equipment shall be so designed and installed as to maintain noise levels as required by the performance standards of the Chicago Zoning Ordinance.

(2) Installation:

(a) No source of flammable vapors, gases or dust shall be within twenty feet horizontally of any unit unless the source is separated from the unit by a wall.

(b) There shall be a manual gas shutoff valve installed at a conveniently accessible location no closer than five feet from the unit.

(c) Complete operating instructions shall be available at the unit.

(d) The installation of the unit shall be such as to make it accessible for inspection and testing. All units, except roof mounted shall have platforms of sufficient size to accommodate all of the components and 36 inches minimum clearance in front of the access doors for service. There shall be a 42-inch high guardrail and a 4-inch high toeboard around the platform except at the platform access. A fixed stairway or ladder to the roof shall be provided for a roof mounted unit.

(e) The unit shall be erected and firmly supported in accordance with the provisions of section 81-14 of this Code.

(f) The unit shall be so installed as to comply with the requirements of chapter 80 of this Code.

(g) If the unit is roof mounted it should be of a weatherproof design or a weatherproof enclosure must be provided.

(3) Performance:

(a) The unit located in a room or space shall be so operated and maintained that the threshhold limit value of 100 ppm. for carbon monoxide and 5000 ppm. for carbon dioxide shall not be exceeded within the room or space.

(b) The maximum allowable concentration of air pollutants for the unit or the occupied room or space were taken from the book "Industrial Ventilation", 8th Edition, 1964, published by the American Conference of Governmental Industrial Hygienists. Periodically the threshhold limit values are revised through research and study of these air pollutants and adjustments shall be made with any lower maximum allowable concentrations set by the American Conference of Governmental Industrial Hygienists.

Section 2. Sections 81-21 and 81-28 of said Code are amended to read as follows:

§81-21 (a) Plans shall be submitted with permit applications for approval and shall show major details of proposed ventilation systems with air-quantities computed according to the requirements of §81-7 of this Code. Such plans, except for structural provisions or alterations, may be certified and sealed by a professional engineer registered in the State of Illinois.

(b) If plans submitted for permit approval include a direct-gas-fired makeup-air heater, the applicant shall certify that such model of direct-gas-fired makeup-air heater has been accepted by the commissioner of buildings for use in the City of Chicago as provided in §81-13.1 (c) of this Code.

§81-28 The inspection of mechanical ventilating or air conditioning systems shall be made as soon as possible after the person responsible for the installation and adjustment and testing of the system has notified the commissioner of buildings in writing that the system has been adjusted and tested and is in good operation and that it fulfills all the requirements prescribed herein, and if such tests are found to fulfill all requirements contained in this ordinance, the commissioner of buildings, upon written request, shall issue a letter of approval to the owner or contractor who made the installation. In the case of systems incorporating direct-gas-fired makeup-air heaters, the initial inspection shall

include the conduct of tests by the installer in the presence of the city inspector, to determine that the system meets all the requirements of sections 81-13.1 and 81-20.1 and each annual inspection shall include similar tests by the owner.

Section 3. §63-11.1 of said Code is amended by adding thereto the following paragraph:

§63-11.1 (f) Makeup-air heaters except direct-gas-fired makeup-air heaters for industrial units, as defined in §48.8 of this Code, inspected and tested as required by §81.28 of this Code.

Section 4. §80-10 of said Code is amended by adding thereto the following paragraph:

§80-10 (e) A direct-gas-fired makeup-air heater as defined in chapter 81.

Section 5. This ordinance shall become effective upon its passage and due publication.

The City of Des Plaines agrees to maintain and operate said reservoir or reservoirs of such capacity that water will be drawn from the City's mains at a substantial uniform rate of flow, as hereinafter provided during the period of this contract.

15) The water supply furnished and taken hereunder shall be drawn by the City of Des Plaines at a substantial uniform rate of flow throughout twenty-four (24) hours of each day of the year. It is hereby agreed that the Commissioner of Water and Sewers of the City and his authorized representatives shall have access to and the right to adjust and control valves and meters in order to limit the flow of water as herein provided and for the purpose of meeting any and all emergencies and necessitous requirements.

16) The City of Des Plaines agrees to comply

with any and all sanitary regulations of the City and the present and future rules, regulations and instructions of the Department of Water and Sewers of the City applicable to cross-connections and dual water supplies as are in force in the City of Chicago Water System. The City of Des Plaines further agrees that the duly authorized engineers and inspectors of the City, in collaboration with the representatives of the City of Des Plaines, shall be allowed to make inspections and require tests for tightness of the piping of the water works installations, and of all plants or other buildings of water users within the territorial limits of the City of Des Plaines, and the City of Des Plaines further agrees to make such changes in its piping and to eliminate such cross-connections or other connections as in the judgment of the Commissioner of Water and Sewers of the City are necessary. The failure, neglect or refusal on the part of the City of Des Plaines to make promptly and properly such changes in its piping, to maintain tightness, or to eliminate undesirable connections upon notice in writing so to do from said Commissioner of Water and Sewers, shall furnish sufficient grounds for the City to shut off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the City of Des Plaines.

17) The City of Des Plaines agrees to prevent excessive use and waste of water.

18) The City of Des Plaines agrees to appropriate annually sufficient money or so much thereof, as may be necessary, to provide sufficient funds for the payment of the water furnished by the City hereunder. The City of Des Plaines further agrees that it will at all times charge its water consumers sufficient rates in order to provide adequate funds for the payment of water furnished it by the City.

19) It is further agreed that the City may either in law or equity, by suit, mandamus or other proceedings enforce or compel performance of any and all covenants herein contained.

20) In order to safeguard its water supply received hereunder and the City's water supply, the City of Des Plaines hereby agrees to maintain a safe water supply throughout its system and to provide, maintain and operate at all times during the period of this contract, chlorinating equipment or other equally effective health protecting process equipment of such kind and capacity that a proper chlorine residual or similarly effective result may be carried throughout its water supply system. All proposed water works improvements, which must be approved by the Commissioner of Water and Sewers of the City, shall be disinfected in accordance with the requirements of the Department of Water and Sewers of the City; said water works improvements shall not be placed into service until approved as to sanitary quality by the City.

21) The City may adopt any protective or health measures it deems advisable or desirable for the benefit of its water consumers, such as the fluoridation of its water, in any manner that the Commissioner of Water and Sewers of the City shall see fit.

22) The City of Des Plaines agrees to notify the Commissioner of Water and Sewers of the City as promptly as possible of all emergency and other conditions which may directly or indirectly affect the quality of the water received hereunder and the City's water supply and further agrees that the duly authorized Engineers and Inspectors of the City shall be allowed to make inspections and required tests of the quality of the water supply as received hereunder, as well as the quality of the water within the City of Des Plaines distribution system.

23) The City of Des Plaines agrees not to resell or permit any water furnished hereunder to be used to supply any other municipality or any consumer of water located or residing outside the territorial limits of the City of Des Plaines, except if and when it should be specifically authorized so to do by the City Council of the City.

24) The City of Des Plaines further agrees not to sell, lease or give any interest in or right or privilege to utilize its water supply main or mains to any other municipality or any consumer of water whose premises are located outside the territorial limits of the City of Des Plaines, and further agrees not to permit any connection to be made to its water supply main or mains, except to supply consumers within the territorial limits of the City of Des Plaines without first securing the consent in writing of the City Council of the City so to do.

25) At the end of each calendar year during the term of this contract and not later than March 31st of each year, the City of Des Plaines agrees to submit to the Commissioner of Water and Sewers of the City a report in writing showing in cubic feet or gallons the amount of water furnished the City of Des Plaines and the amount in quantity and charges billed by it to consumers during the preceding year and to furnish such other information regarding billing, collections and delinquencies as may be requested from time to time by said Commissioner of Water and Sewers.

26) At the end of each billing period, but at least quarterly, the City of Des Plaines agrees to submit to the Commissioner of Water and Sewers of the City a complete list of all water consumers of the City of Des Plaines located or residing outside its corporate limits, showing name, location, character of occupancy, amount of water in cubic feet or gallons furnished, charges billed and payment to the City of Chicago at the higher rate.

27) To secure prompt payment of the water bills, the City shall have the right at any time to require the City of Des Plaines to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water required by the City of Des Plaines for a period of ninety (90) days at the then prevailing metered rate, which said advance payment the City of Des Plaines hereby agrees to make upon demand.

28) The City shall not be responsible in damages for any failure to supply water or for interruption of the water supply furnished hereunder. The City of Des Plaines agrees to save and keep harmless the City from all damage to real and personal property occasioned or caused by the making of the water connection or connections herein referred to or caused by the furnishing of water hereunder, and shall also keep and save harmless the City from all damage of any kind, nature and description which may arise as the result of the making of this agreement.

29) The City reserves the right to its Commissioner of Water and Sewers to decide all questions arising as to the proper performance of the contract.

30) If the City of Des Plaines shall refuse, neglect or fail to pay promptly the water bills rendered for the water supplied it hereunder within the time or times prescribed by the ordinances of the City, or if the City of Des Plaines shall fail to comply with or perform any of the conditions or obligations on its part to be complied with or to be performed hereunder, and if after such failure the City shall

deliver at the City Hall of the City of Des Plaines, addressed to the Mayor of the City of Des Plaines a notice in writing of its intention to shut off the supply at the expiration of five (5) days after the giving of such notice, and to terminate this contract unless within such five (5) days the City of Des Plaines shall make good such failure. The shutting-off of the supply of water for any such cause shall not release the City of Des Plaines from its obligation to make payments of any amount or amounts due or to become due in accordance with the terms hereof.

31) No assignment or transfer of this agreement shall be made by the City of Des Plaines.

32) The City of Des Plaines hereby waives any defenses it may have by virtue of any governmental function it exercises in any action brought at law or equity under the terms of this contract.

33) No officer, official or agent of the City has the power to amend, modify or alter this agreement or waive any of its conditions or to bind the City by making any promise or presentation not contained herein.

34) The authority of the officials of the City to execute this agreement is evidenced by the authority of the City Council of the City of Chicago given on the ..... day of ..... A.D., 19....., and published in the Journal of Proceedings of the City Council for said date on pages..... thereof.

35) The authority of the officials of the City of Des Plaines, Illinois, to execute this agreement is evidenced by the resolution passed by the Council of the City of Des Plaines, Illinois, at a regular meeting of said City Council duly held on the ..... day of ..... A.D., 19.....

36) This agreement is subject to cancellation by the City of Chicago in the event the Supreme Court of the United States of America or any other court of competent jurisdiction decrees that the City of Chicago has no right to contract for, sell, disperse, distribute or limit the amount of water the City may use for domestic pumpage or otherwise places a burden on the City in connection with the withdrawal of water from Lake Michigan, or otherwise dispose of water from Lake Michigan to any municipality or user residing outside the limits of the City of Chicago.

37) In Witness Whereof, the City of Chicago has caused this agreement to be signed in quintuple originals (each executed copy consistituting an original) by its Commissioner of Water and Sewers, countersigned by its Comptroller, approved by its Mayor, and its corporate seal to be hereto affixed and duly attested by its Clerk, and the City of Des Plaines has caused the same to be signed in quintuple originals (each executed copy constituting an original) by its Mayor, and its corporate seal to be hereto affixed and duly attested by its Clerk, on the day and year first above written.

The following is said substitute proposed ordinance as passed:

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. The Municipal Code of Chicago is amended by inserting, in proper numerical position, the following new sections:

§60-94.1 Makeup-air heater.) No direct-gas-fired makeup-air heater may be located in any hazardous use room, nor may the discharge from a direct-gas-fired makeup-air heater be directed into a hazardous use room unless the unit shall be designed to insure that flow velocity at the outlet of the unit can never fall below 200 feet per minute, in order that there can be no possibility of backflow of air from the room.

§81-13.1 Direct-gas-fired makeup-air heaters.) A makeup-air heater is defined as a heater used to temper air supplied to only an industrial unit, as defined in §48.8 of this code, to correct negative pressures caused by exhaust systems. Such a unit is not intended to supply any of the ventilating requirements set forth in section 81-7 or any of the regular heating requirements of the area into which it discharges; separate space heating equipment must be available for this purpose. A direct-gas-fired makeup-air heater is defined as a makeup-air heater in which all the heat and products of combustion generated by the gas burning device are released into the air stream being heated. Each manufacturer of a direct-gas-fired makeup-air heater (hereinafter referred to in this §81-13.1 as the "unit") shall submit test-data, results and catalogs, certified by a registered professional engineer, to the commissioner of buildings for acceptance for use in the City of Chicago. No unit shall be accepted unless it complies with the following requirements:

(1) Performance:

(a) The unit shall be capable of maintaining the required 70°F. minimum discharge air temperature, irrespective of the outside air temperature, down to –10°F.

(b) The heated air when delivered from the unit shall contain, at the point of discharge, not more than twenty-five parts per million of carbon monoxide, not more than twenty-five hundred parts per million of carbon dioxide, and no other contaminants in quantities that would create a health hazard to the occupants of the building.

(c) The unit shall meet these standards under each of the following conditions:

With maximum rated air flow of the unit and maximum rated burner input;

With maximum temperature rise of 110°F. and with makeup-air throttled to one-half of the rated air flow or one-half the minimum rated air flow if the unit automatically modulates or varies the volume of makeup-air flow, to represent severe fouling of the air filters; and

If the combustion system utilizes a pre-mixed gas-air mixture, under normal air flow conditions but with the pre-mixed combustion air reduced to the minimum value which the flame supervision equipment shall permit.

(2) Makeup-air supply:

(a) The unit shall use one hundred percent outside air for the air to be heated.

(b) The intake velocity at the face of the outside air opening shall be less than 600 feet per minute.

(c) All air before passing through or over burners shall be filtered to prevent leaves, papers or other objects from being picked up from the outside, ignited and discharged.

(d) The connection between the outside air intake and the unit shall be in a straight line. If this is not possible, proper turning vanes shall be used so that the air is evenly distributed across the face of the combustion area and to prevent stratification.

(3) Combustion system and controls:

(a) The system must be purged with three or more air changes in the unit and connecting ducts before the pilot can be ignited or main burner valve is allowed to open. The fuel supply shall shut off in the event that flow velocity at the outlet of the unit shall fall below 200 feet per minute.

(b) There shall be a thermostatic device for normal operation of the gas burner component. Controls shall also be provided to limit maximum and minimum air temperatures. A low temperature limit control in the discharge air stream shall sound an alarm in the event the discharge air temperature falls below fifty degrees F. A high temperature limit control shall shut off all burners in the event the discharge air temperature rises above 100°F. and the system must require a manual resetting and purging to start.

(c) The gas burner and combustion system shall be a modulating type that will operate automatically through a turndown ratio from maximum to minimum firing rate of not less than ten to one.

(d) All burners must be positively ignited. No runners or flash tubes will be permitted for burner ignition. At normal full air flow the ignition system shall provide for smooth and quick flame ignition.

(e) All burners must be equipped with a flame safety device to insure flame existence. Flame safety controls shall be used which will shut off the fuel supply within four seconds in case of flame failure. Flame safety controls must be of the type that shut the burner system off in the event of internal malfunction of the controls.

(f) Safety devices shall be used to shut off the pilot and main burners in case of any of the following:

failure of gas/air mixture supply;

excessively high or low gas pressure;

instrument or control air pressure failure (when part of unit);

electrical power failure;

reduction of makeup-air flow through unit of more than fifty percent; or

reduction of flow velocity at the outlet of the unit below 200 feet per minute.

(4) Design:

(a) There shall be provision for operation without heating for summer ventilation.

(b) The design and construction of the direct-gas-fired makeup-air heater shall include:

Sight glasses or ports, so the burner can be viewed while making adjustments.

Access doors, so that the entire burner is accessible for cleaning or removal.

(c) The unit shall be rated as to its capacity in cubic feet per minute of air raised 100 degrees F. in temperature at a given Btu input to the burners. Each unit shall deliver the manufacturer's rating at the established air temperature rise and Btu input.

(d) The basic design of the unit shall be such that design air flow rates through or over the burner flames shall not adversely affect the combustion of the gas at the burner heads.

§81-20.1 Operational requirements — direct-gas-fired makeup-air heaters.) When installed, a direct-gas-fired makeup-air heater shall comply with the following requirements, in addition to all other requirements for mechanical ventilation equipment and in addition to the requirements for direct-gas-fired makeup-air heaters (hereinafter in this §81-20.1 referred to as the "unit") imposed under §81-13.1:

(1) Design:

(a) The total discharge of makeup-air by the unit shall be not less than 10,000 cfm, but shall not exceed 110 percent of the capacity of the exhaust system in conjunction with which it is used.

(b) The unit shall be so controlled by electrical interlocking devices that it will operate only when the mechanical exhaust system is in operation and all access doors on the air suction side of the unit are tightly closed.

(c) The equipment shall be so designed and installed as to maintain noise levels as required by the performance standards of the Chicago Zoning Ordinance.

(2) Installation:

(a) No source of flammable vapors, gases or dust shall be within twenty feet horizontally of any unit unless the source is separated from the unit by a wall.

(b) There shall be a manual gas shutoff valve installed at a conveniently accessible location no closer than five feet from the unit.

(c) Complete operating instructions shall be available at the unit.

(d) The installation of the unit shall be such as to make it accessible for inspection and testing. All units, except roof mounted shall have platforms of sufficient size to accommodate all of the components and 36 inches minimum clearance in front of the access doors for service. There shall be a 42-inch high guardrail and a 4-inch high toeboard around the platform except at the platform access. A fixed stairway or ladder to the roof shall be provided for a roof mounted unit.

(e) The unit shall be erected and firmly supported in accordance with the provisions of section 81-14 of this Code.

(f) The unit shall be so installed as to comply with the requirements of chapter 80 of this Code.

(g) If the unit is roof mounted it should be of a weatherproof design or a weatherproof enclosure must be provided.

(3) Performance:

(a) The unit located in a room or space shall be so operated and maintained that the threshhold limit value of 100

ppm. for carbon monoxide and 5000 ppm. for carbon dioxide shall not be exceeded within the room or space.

(b) The maximum allowable concentration of air pollutants for the unit or the occupied room or space were taken from the book "Industrial Ventilation", 8th Edition, 1964, published by the American Conference of Governmental Industrial Hygienists. Periodically the threshhold limit values are revised through research and study of these air pollutants and adjustments shall be made with any lower maximum allowable concentrations set by the American Conference of Governmental Industrial Hygienists.

SECTION 2. Sections 81-21 and 81-28 of said Code are amended to read as follows:

§81-21 (a) Plans shall be submitted with permit applications for approval and shall show major details of proposed ventilation systems with air-quantities computed according to the requirements of §81-7 of this Code. Such plans, except for structural provisions or alterations, may be certified and sealed by a professional engineer registered in the State of Illinois.

(b) If plans submitted for permit approval include a direct-gas-fired makeup-air heater, the applicant shall certify that such model of direct-gas-fired makeup-air heater has been accepted by the commissioner of buildings for use in the City of Chicago as provided in §81-13.1 (c) of this Code.

§81-28 The inspection of mechanical ventilating or air conditioning systems shall be made as soon as possible after the person responsible for the installation and adjustment and testing of the system has notified the commissioner of buildings in writing that the system has been adjusted and tested and is in good operation and that it fulfills all the requirements prescribed herein, and if such tests are found to fulfill all requirements contained in this ordinance, the commissioner of buildings, upon written request, shall issue a letter of approval to the owner or contractor who made the installation. In the case of systems incorporating direct-gas-fired makeup-air heaters, the initial inspection shall include the conduct of tests by the installer in the presence of the city inspector, to determine that the system meets all the requirements of sections 81-13.1 and 81-20.1 and each annual inspection shall include similar tests by the owner.

SECTION 3. §63-11.1 of said Code is amended by adding thereto the following paragraph:

§63-11.1 (f) Makeup-air heaters except direct-gas-fired makeup-air heaters for industrial units, as defined in §48.8 of this Code, inspected and tested as required by §81.28 of this Code.

SECTION 4. §80-10 of said Code is amended by adding thereto the following paragraph:

§80-10 (e) A direct-gas-fired makeup-air heater as defined in chapter 81.

SECTION 5. This ordinance shall become effective upon its passage and due publication.

It is hoped that the proposal which provides that the city share the cost of providing sidewalk repairs in residential areas with the abutting property owner, will result in a significant improvement for the city as well as a reduction of personal injury suits against the city for injuries sustained on defective sidewalks within the city.

2. The sidewalks being repaired shall be located in an area that is zoned residential.

3. This program shall apply only when an application is filed on behalf of all of the owners of property abutting defective sidewalks covering a distance of one side of one city block so that if said application is approved and said work performed one side of a complete city block of sidewalk will be placed in a condition of good repair.

No work shall be authorized by the Commissioner of Streets and Sanitation until he is notified by the Comptroller that all deposits required for the particular area covered by each application have been received.

8. No approval shall be given by the Commissioner of Streets and Sanitation when the $1,000,000.00 budget appropriation herein referred to shall have been committed to this program.

9. The Commissioner of Streets and Sanitation shall make an inspection of the repairs and if they are in compliance with the City's requirements he shall authorize the Comptroller to make payment to the contractor for the cost of said repairs which payment shall be made by taking the amount deposited by the applicants and the portion allotted to said contract from Motor Fuel Tax Funds.

10. The Commissioner of Streets and Sanitation shall have the right to direct the Comptroller to refund any and all deposits remitted under this program if the requirements of any section of this resolution are not complied with.

This resolution shall be in full force and effect from and after its passage and publication.

Referred—PROPOSED ORDINANCE TO AMEND TEXT OF CHICAGO ZONING ORDINANCE (INCREASE IN PERMISSIBLE FLOOR AREA IN RESIDENTIAL STRUCTURES—ARTICLE 7).

Honorable Richard J. Daley, Mayor, submitted the following communication, which was, together with the proposed ordinance transmitted therewith, *Referred to the Committee on Buildings and Zoning:*

OFFICE OF THE MAYOR
CITY OF CHICAGO

June 24, 1964.

To the Honorable, The City Council of the City of Chicago:

GENTLEMEN—I transmit herewith for your consideration a proposed amendment to the Chicago Zoning Ordinance which seeks to permit an increase in the permissible floor area ratio in residential structures in direct proportion to a decrease in the permissible number of dwelling units.

In essence the proposal will permit a building to be erected which contains larger type apartments but fewer total number of apartments than permitted under the existing zoning provisions. It will obviate the need for variations which, in the past, have provided a partial step toward achieving the desirable effect which this ordinance will establish.

Your favorable consideration is respectfully requested.

Very truly yours,
(Signed) RICHARD J. DALEY,
Mayor.

Felicitations Extended to Mr. Al F. Gorman on Retirement from Public Service.

Honorable Richard J. Daley, Mayor, on behalf of himself and other members of the City Council, submitted the following proposed resolution:

WHEREAS, The recent resignation of Al F. Gorman as a member of the staff of the Corporation Counsel of the City of Chicago brings to a close a truly remarkable career of public service — one equalled for length and dedication by few, if any; and

WHEREAS, In 1950 the Mayor and City Council of the City of Chicago honored Al Gorman on the fiftieth anniversary of his assumption of public office — his election in 1900 as Supervisor of the Town of Lake prior to its incorporation into the City of Chicago. Now, fourteen years later, on the occasion of his retirement, the Mayor and City Council are pleased to have this opportunity to again honor Al Gorman on his completion of sixty-four productive, active years in the service of the public. Twice he was elected Senator of the State of Illinois. He was then elected City Clerk of the

City of Chicago, after which he served for five years as Chief Clerk in the office of the County Clerk of Cook County. Since his appointment in 1932 as Assistant Corporation Counsel he has served continuously under five mayors and five corporation counsels. The hundreds of legal opinions written by him, covering a wide range of municipal problems, comprise a veritable textbook on municipal law. His broad understanding of municipal government in its myriad facets made him senior advisor to the City Council on legislative matters which affected the city, and for many sessions of the State Legislature he guided and guarded the city's interests through intricate processes of state legislation.

Al Gorman is a man of keen intelligence, sterling principles, deep loyalties, quiet reserve and undeviating courtesy. He is held in highest regard and respect by all who sought his counsel and by his associates and friends in the City Council, the various departments of city government, and his own department — the law department. He will be sorely missed; now, therefore,

Be It Resolved, That the Mayor and the City Council of the City of Chicago hereby express to Al F. Gorman their deep appreciation for the many years of invaluable service he has rendered the City, and extend to him their sincere wishes that he may spend the years of his retirement in health and contentment, proud in the consciousness that he has made a noteworthy contribution to his profession and to his city.

On motion of Alderman J. P. Burke (seconded by Alderman Bohling and Alderman Sheridan) said proposed resolution was *Adopted.*

Alderman Burke and the seconding aldermen thereupon addressed the Council, recalling the competent, prompt and courteous cooperation they had always received from Mr. Gorman when they sought his advice because of his vast knowledge and experience in legal matters affecting City government. They extended best wishes for a long and happy retirement.

On motion of Alderman J. P. Burke the privilege of the floor was extended to Mr. John C. Melaniphy, Corporation Counsel, who expressed his esteem for the personal integrity and dedication to the City's interests he had noted in Mr. Gorman's performance as he had served as one of his assistants in the Department of Law. He also referred to the numerous opinions Mr. Gorman had rendered which had benefitted the City and which had stood the test of appeals to higher courts in the State of Illinois. Mr. Melaniphy concluded his remarks by stating that although the Department of Law would miss Mr. Gorman's competent services, he was happy to wish him a long and happy retirement which his many years of faithful service had so well merited.

Honorable Richard J. Daley, Mayor, also addressed the Council paying tribute to the many services rendered to him personally by Mr. Gorman and expressed the hope for a well earned rest for his friend.

MISCELLANEOUS COMMUNICATIONS, REPORTS ETC. REQUIRING COUNCIL ACTION (TRANSMITTED TO CITY COUNCIL BY CITY CLERK).

The City Clerk transmitted communications, reports, etc., relating to the respective subjects listed below, which were acted upon by the City Council in each case in the manner noted, as follows:

U. S. Supreme Court Decision in Case Involving Reapportionment of Senatorial Districts in Illinois.

The following communication from John C. Melaniphy, Corporation Counsel, addressed to the City Council under date of June 23, 1964, which was *Placed on File:*

GENTLEMEN—On July 1, 1963, (C.J. 477) the City Council adopted a resolution requesting the Corporation Counsel to intervene in the case of Joseph Germano, et al. vs. Otto Kerner, et al. then pending in the United States District Court for the Northern District of Illinois, Eastern Division, which case involved the question as to the constitutionality to the amendment of 1954 to the Constitution of Illinois providing for the number of senatorial districts in Illinois. Your Corporation Counsel did intervene by becoming an attorney of record in the case in the Supreme Court of the United States in Case No. 636.

We beg leave to report that on June 22, 1964, the Supreme Court of the United States reversed the District Court and held that the 1954 amendment to the Constitution of Illinois was unconstitutional. It remanded the case to the United States District Court for further proceedings to require the General Assembly to redistrict the senatorial districts based upon population. A petition for rehearing will probably be filed and probably will not be disposed of by the Supreme Court of the United States until the October term."

Aldermen Murray, Goldberg and Despres on behalf of themselves, the other members of the City Council and the people of Chicago commended Mr. Melaniphy, who had intervened in the case before the United States Supreme Court, which resulted in a more equitable representation in the General Assembly.

Court Decisions.

Also communications from the Law Department informing the City Council as to court decisions in the causes noted, which were *Placed on File,* as follows:

Franklin S. Haiman v. *Robert Morris* (O. W. Wilson, as Superintendent of the Police Department of Chicago, Appellant), Illinois Supreme Court No. 37276. — The Illinois Supreme Court on June 18, 1964 reversed the judgment of the Superior Court (now Circuit) of Cook County in the above entitled cause, which had declared the book "Tropic of Cancer" to be not obscene and enjoined Superintendent of Police O. W. Wilson and certain suburban police chiefs from interfering with its exhibition, sale and distribution. The Supreme Court ordered the injunction be dissolved and the complaint dismissed. (The Supreme Court held that communications which are obscene are not entitled to constitutional protection and that a book which is patently offensive, and which to the average person, applying contemporary community standards, has as its dominant theme an appeal to the prurient interests, is one which the courts will deem to be obscene, etc.)

Charles W. Wise, Appellant, v. *Civil Service Commission of Chicago,* Appellee, Appellate Court No. 49506.—The Appellate Court on June 19, 1964 dismissed the appeal in the above entitled cause. (Appellant, Charles W. Wise is a discharged Building Inspector who appealed from a judgment upholding his discharge by the Civil Service Commission.)

4. The Government agrees that until such time as it shall have made payment for the New Escrow Project Temporary Loan Note as set forth in Paragraph 2 hereof, it will hold said New Escrow Project Temporary Loan Note and collateral documents for the account of the City. When the Government shall have made payment of the Requisitioned Payment in the manner set forth above, the Government shall hold said New Escrow Project Temporary Loan Note for its own use and benefit as its own property. When and if the City shall deposit with each paying agent mentioned in Paragraph 2 hereof, out of moneys obtained by the City from sources other than the aforesaid Project Temporary Loan, a sum sufficient to pay the principal of and interest to maturity on the New Preliminary Loan Notes for which such agent is the paying agent, the Government will cancel and surrender to the City said New Escrow Project Temporary Loan Note, and the obligation of the Government to make payment of the Requisitioned Payment shall be discharged.

When the Government shall have made payment of the Requisitioned Payment in the manner above set forth, the Government shall hold said Escrow Project Temporary Loan Note for its own use and benefit as its own property. When and if the City shall deposit with each paying agent mentioned in Paragraph 2 hereof, out of moneys obtained by the City from sources other than the aforesaid Project Temporary Loan, a sum sufficient to pay the principal of and the interest to maturity on the Preliminary Loan Notes for which such agent is the paying agent, the Government will cancel and surrender to the City said Escrow project Temporary

Landlord shall have a first lien on Tenant's interest hereunder, and on Tenant's property now or hereafter located in said premises, or elsewhere, to secure the payment of all moneys due hereunder, which lien may be foreclosed in equity and in case of any such foreclosure proceeding, a receiver shall be appointed to take possession of said premises and property and relet the premises under order or court.

The obligation of Tenant to pay the rent reserved hereby during the balance of the term hereof, or during any extension thereof, shall not be deemed to be waived, released or terminated, nor shall the right and power to confess judgment given in the preceding paragraph hereof be deemed to be waived or terminated by the service of any five-day notice, other notice to collect, demand for possession, or notice that the tenancy hereby created will be terminated on the date therein named, the institution of any action of forcible detainer or ejectment, or any judgment for possession that may be rendered in such action, or any other act or acts resulting in the termination of Tenant's right to possession of the premises. The Landlord may collect and receive any rent due from Tenant and payment or receipt thereof shall not waive or affect any such notice, demand, suit or judgment, or in any manner whatsoever waive, affect, change, modify or alter any rights or remedies which Landlord may have by virtue hereof.

The failure, neglect or refusal on the part of the Village to make promptly and properly such changes in its piping, to maintain tightness, or to eliminate undesirable connections upon notice in writing so to do from said Commissioner of Water and Sewers, shall furnish sufficient grounds for the City to shut off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the Village.

(17) The Village agrees to prevent excessive use and waste of water.

(18) The Village agrees to appropriate annually sufficient money and to include in its annual tax levy the amount appropriated or so much thereof, as may be necessary, to provide sufficient funds for the payment of the water furnished by the City hereunder. (20) In order to safeguard its water supply received hereunder and the City's water supply, the Village hereby agrees to maintain a safe water supply throughout its system and to provide, maintain and operate at all times during the period of this contract, chlorinating equipment or other equally effective health protecting process equipment of such kind and capacity that a proper chlorine residual or similarly effective result may be carried throughout its water supply system. All proposed water works improvements which must be approved by the Commissioner of Water and Sewers of the City, shall be disinfected in accordance with the requirements of the Department of Water and Sewers of the City; said water works improvements shall not be placed into service until approved as to sanitary quality by the City.

(21) The City may adopt any protective or health measures it deems advisable or desirable for the benefit of its water consumers, such as the fluoridation of its water, in any manner that the Commissioner of Water and Sewers of the City shall see fit.

(22) The Village agrees to notify the Commissioner of Water and Sewers of the City, as promptly as possible of all emergency and other conditions which may directly or indirectly affect the quality of the water received hereunder and the City's water supply and further agrees that the duly authorized engineers and inspectors of the City shall be allowed to make inspections and required tests of the quality of the water supply as received hereunder, as well as the quality of the water within the Village distribution system.

(23) The Village agrees not to resell or permit any water furnished hereunder to be used to supply any other municipality, or any consumer of water located or residing outside the territorial limits of the Village except if and when it should be specifically authorized so to do by the City Council of the City.

(24) The Village agrees to use City water exclusively during the period of this contract.

(25) The Village further agrees not to sell, lease or give any interest in or right or privilege to utilize its water supply main or mains to any other municipality or any consumer of water whose premises are located outside the territorial limits of the Village, and further agrees not to permit any connection to be made to its water supply main or mains except to supply consumers within the territorial limits of the Village, without first securing the consent in writing of the City Council of the City so to do.

(26) At the end of each calendar year during the term of this contract, and not later than March 31st of each year, the Village agrees to submit to the Commissioner of Water and Sewers of the City a report in writing showing in cubic feet or gallons the amount of water furnished the Village and the amount in quantity and charges billed by it to consumers during the preceding year and to furnish such other information regarding billing, collections and delinquencies as may be requested from time to time by said Commissioner of Water and Sewers.

(27) At the end of each billing period, but at least quarterly, the Village agrees to submit to the Commissioner of Water and Sewers of the City, a complete list of all water consumers of the Village located or residing outside its corporate limits, showing name, location, character of occupancy, amount of water in cubic feet or gallons furnished, charges billed and payment to the City of Chicago at the higher rate.

(28) To secure prompt payment of the water bills, the City shall have the right at any time to require the Village to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water

required by the Village for a period of ninety (90) days at the then prevailing metered rate, which said advance payment the Village hereby agrees to make upon demand.

(29) The City shall not be responsible in damages for any failure to supply water or for interruption of the water supply. The Village agrees to save and keep harmless the City from any and all damages to real and personal property occasioned or caused by the making of the water connection or connections herein referred to, or caused by the furnishing of water hereunder, and shall also keep and save City harmless from all damage of any kind, nature and description which may arise as the result of the making of this agreement.

(30) The City reserves the right to its Commissioner of Water and Sewers to decide all questions arising as to the proper performance of this contract.

(31) In furtherance and not in limitation of this contract, it is mutually agreed that all rights of the City and the Village arising under the Water Supply Contract No. 20188 between the City of Chicago and the Village of Rosemont dated October 21st, 1958 which expired December 1st, 1962, and all rights of either party arising from the delivery of water prior to the date of the execution of this agreement are extinguished, except for the express reservation of the right of the City to obtain payment for, or to enforce collection of any unpaid water charges accruing prior to the date of execution of this agreement.

(32) If the Village shall refuse, neglect or fail to pay promptly the water bills rendered for the water supplied it hereunder within the time or times prescribed by the ordinances of the City, or if the Village shall fail to comply with or perform any of the conditions or obligations on its part to be complied with or to be performed hereunder, and if after such failure the City shall deliver at the Village Hall of the Village of Rosemont, addressed to the President and Board of Trustees of the Village of Rosemont, a notice in writing of its intention to shut off the supply of water on account of such failure, refusal or neglect, then the City shall have the right to shut off the supply at the expiration of five (5) days after the giving of such notice and to terminate this contract unless within such five (5) days the Village shall make good such failure. The shutting off of the supply of water for any such cause shall not release the Village from its obligation to make payments of any amount or amounts due or to become due in accordance with the terms hereof.

(33) No assignment or transfer of this agreement shall be made by the Village.

(34) The Village hereby waives any defenses it may have by virtue of any governmental function it exercises in any action brought at law or equity under the terms of this contract.

(35) No officer, official or agent of the City has the power to amend, modify or alter this agreement or waive any of its conditions or to bind the City by making any promise or representation not contained herein.

(36) This agreement is subject to cancellation by the City of Chicago in the event the Supreme Court of the United States of America or any other court of competent jurisdiction decrees that the City of Chicago has no right to contract for, sell, disperse, distribute or limits the amount of water the City may use for domestic pumpage or otherwise places a burden on the City in connection with the withdrawal of water from Lake Michigan or otherwise dispose of water from Lake Michigan to any municipality or user residing outside the limits of the City of Chicago.

The shutting off of the supply of water for any such cause shall not release the Village of Westchester and the Village of Broadview, Jointly, from their obligations to make payments of any amount or amounts due or to become due in accordance with the terms hereof.

32) No assignment or transfer of this agreement shall be made by the Village of Westchester and the Village of Broadview, Jointly.

If the cost of electricity or the cost of maintaining and operating the lighting system shall decrease, then the undersigned subscriber shall be entitled to a proportionate reduction, similarly determined, from the amounts otherwise due hereunder, corresponding to such decrease.

3. The undersigned subscriber shall in no event be liable for any amount of excess of the payments to be made by the subscriber under this subscription agreement, and no officer, director or member of the Association shall be liable to any subscriber or any other person for anything done hereunder by any subscriber or the Association. The sole obligation of the Association hereunder is to receive, when paid, the amounts due from the subscriber and to pay to the contractor who shall maintain and operate the lighting system the amounts due it out of the funds collected from the subscribers to this and other subscription agreements.

4. The Association reserves and shall have the right in its sole discretion to shut off the lights in front of the undersigned's property at any time and from time to time if the undersigned shall at any time default in payment of any of the amounts due hereunder.

b. Boundary Map (See Exhibit No. 1). The boundaries of the Urban Renewal Area are shown on the attached Boundary Map.

2. Types of Proposed Renewal Action

a. Acquisition and clearance of properties with redevelopment for integrated regional shopping center facilities. (See Exhibit No. 2).

b. Public improvements of a unified design to support a regional shopping center and to enhance its compatibility with the surrounding neighborhoods.

c. A program to foster private rehabilitation of commercial properties consistent with the overall design objectives of the shopping center.

The Objectives of the Renewal Program.

1. The revitalization of a commercial district to form a modern regional shopping center to serve an estimated ultimate population of over 1,200,000 by providing for shoppers basic amenities, conveniences and attractions comparable to those in outlying shopping centers.

2. Shall be supported by appropriate public facilities, institutions, offices, as well as an upgrading and construction of housing in the surrounding community.

3. Shall be served by the necessary roadways, streets, public transportation, parking and public utilities. This will be directed toward—removal of existing vehicular traffic and congestion from the main shopping streets—63rd Street and Halsted Street—in the heart of the area, and major separation of pedestrians from vehicles by replacing of these vehicular trafficways with pedestrian malls.

—By-passing of through traffic around the center via efficient, pavement divided streets —thereby improving the general circulation pattern.

—Provision of large-scale, integrated parking facilities encircling the business center in convenient proximity to stores.

—Protection of adjoining residential neighborhoods from the present heavy influx of vehicles by provision of large-scale parking facilities within the business zone as well as improved circulation pattern.

—Elimination of non-conforming uses, blighted structures and other blighting influences from the shopping center.

—Improvement of public transit facilities through exclusive transit lanes and an improved "elevated" structure.

4. It will be the policy to guide the design and construction of all developments in the renewal area in such a manner to insure the achievement of these objectives, and in coordination with the existing structures and facilities which are to remain.

5. To offer assistance to private property owners in properties, not to be acquired, in the rehabilitation of their structures so that their design will conform to the overall Urban Renewal design of the new commercial shopping center.

The accompanying site plan expresses generally the development and design objectives (See Exhibit No. 5). This site plan is for illustrative purposes only and incorporates a program of:

a. Economically sound redevelopment which will provide maximum return to the community.

b. Architectural design, site planning and landscape design of high quality in treatment of open spaces, buildings, use of materials, scale, appropriateness, functional utility, and harmonious relation to existing development and redevelopment.

Specifically the facades and rears of these retail-commercial structures in the shopping area proper are to be enhanced in their appearance through a public program of covered walkways, rear screening, and mall improvement. These public mall and arcades improvements, financed in their construction and maintenance through special assessments will be of a design to achieve conformity and harmony in the Central Englewood Area. One of the

objectives of such a central design is a coherent unity. This improvement in the immediate environment of each commercial structure and throughout the renewal area is directed toward a more attractive setting which when combined with individual rehabilitation will provide a markedly new environment for its retail functions. Rehabilitation will also be encouraged and rehabilitation services and guidance will be available for the retail commercial structures to remain in the renewal area.

The interiors of the vast majority of the retail-commercial structures in the Central Englewood area are in compliance with or well above City codes. Whatever interior alterations are made are usually done in accorance with their retail purposes i.e., counter arrangements, fixturing, and decorating. Continued maintenance of the structure interior in compliance with codes and with their retail objectives will meet the objectives of the renewal program for Central Englewood.

c. Project Improvements.

1. Relocation of 63rd and Halsted Streets to form a by-pass route generally following the present alignment of 61st Place and Union Avenue.

2. Streets, sidewalks, retaining walls, screening, malls, arcades and canopies, utility lines, and structures, street furniture—including lighting and signs, paving, planting and landscaping, etc., will conform to good design and will be coordinated in accordance with the objectives of the program.

2. Land Use Provisions and Building Requirements (See Exhibit No. 3).

a. Business District "B"—Permitted Uses: General retail uses designed to cater to the consumer needs of a large region; namely, those retail, professional service, recreational, and other uses such as office, financial, and institutional uses consistent with the functions of a major shopping center such that harmonious and beneficial relations to existing developments within and without the renewal area shall prevail. All uses except "drive in" uses which provide services or goods to customers in parked vehicles shall be in completely enclosed buildings. However, such "drive in" services, including automobile service stations, shall not be permitted along the 63rd Street or Halsted Street frontages within the project area.

—Maximum Floor Area Ratio: 5.0

—Permitted Signs:

On any lot, the total area of all signs shall be limited to eight times the lineal feet of frontage of such lot and no sign shall exceed 200 square feet in area. No business sign shall project more than 12 inches across the property line into the public way.

1. Project Proposals:

a. The Property Acquisition Map (see attached) identifies all properties now proposed for acquisition and clearance as well as for public facilities.

b. Acquisition and demolition of any properties not now designed for such treatment may result in the execution stage. The criteria to be applied to determine any additional properties which might be acquired and cleared are as follows:

(1) that the structure cannot be economically rehabilitated to achieve compliance with the minimum codes of the City of Chicago;

(2) that the owners of existing vacant land in non-acquisition areas do not agree to develop their holdings within two years and in accordance with the objectives of the Urban Renewal Plan.

c. A number of properties in the clearance sections (see Clearance Section Map attached) may not be acquired, provided:

(1) that their uses are consistent with the proposed continued use or proposed reuse of specific sections according to the Urban Renewal Plan;

(2) that the owners, their successors, or assigns, will covenant with the Department of Urban Renewal to observe all provisions of the plan, including land use controls, and further, that the property is brought up to standard, namely, in conformity with the applicable codes and ordinances of the City of Chicago.

2. Rehabilitation and Conservation:
Methods to be employed in achieving rehabilitation or conservation.

a. The Urban Renewal Plan has developed specific planning and property renovation proposals which will encourage the physical rehabilitation of the renewal area's retail-commercial facilities.

b. A continuous and vigilant enforcement of the applicable existing laws, codes, ordinances and regulations of the City of Chicago and the State of Illinois will be in effect and in force within the Urban Renewal Project Area (Central Englewood Ill. R-47).

They are:

1. Municipal Building Code
2. Housing Code
3. Plumbing Code
4. Electrical Code
5. Illinois Urban Renewal Consolidation Act of 1961
6. Chicago Zoning Ordinance, as amended.

The following structures found to have major deficiencies may be acquired if they are not brought into conformance with applicable standards:

6128-30 S. Halsted Street
6215 S. Halsted Street
6240-44 S. Halsted Street
6454 S. Halsted Street
6458 S. Halsted Street
6504 S. Halsted Street
6534-36 S. Halsted Street
6538-44 S. Halsted Street
6541 S. Halsted Street
926 W. 63rd Street.

d. The rehabilitation objectives for the properties in the conservation area shall be as follows:

1. Remodel retail fronts to harmonize with adjacent fronts, giving attention to colors, materials, and sign placement.
2. Paint or refinish sides of building which project above adjacent buildings.
3. Use materials of proven durability for retail fronts. Plastic or baked enamel is not recommended.
4. Remove deteriorated store front framing and trim. Clean or paint as needed.
5. Clean, paint, point or sandblast facing materials regularly.
6. Entire building front to reflect building usage. Remodel buildings as their uses change, to express the changes.
7. Remove sign structures that are not used and remove deteriorated signs. Properly patch the buildings after removal.
8. Re-paint and clean signs regularly. Illuminated signs to be in good working order.
9. Remove billboards, including supporting structures, from tops of buildings.
10. Use clear show-window glass. Paint, stick-on letters, or other covering of show-windows is not recommended.
11. Remove all awnings and awning mechanism where fixed canopy is used. Patch building after removal. Awnings not replaced by the canopy are to be in good condition and fully operative.
12. Maintain interiors of stores. Retail fixtures to be in good repair.
13. Provide adequate lighting and interior climate control.

Upon the acquisition of such properties, which "may be acquired" the city will elect to either:

a. Demolish the structures thereon and dispose of the land in accordance with the Urban Renewal Plan; or

b. Sell the property to a private purchaser at its fair market value subject to its being rehabilitated to all the rehabilitation objectives including the codes and ordinances of the City of Chicago that harmonious and beneficial relations to existing developments within and without the renewal area shall prevail.

(1) Commercial Properties. Characteristics of improvements, store arrangement, design, finish, equipment and other building features shall be judged on the basis of their suitability and feasibility for rehabilitation. At the completion of all rehabilitation the property should be safe and sound in all physical respects and should be refurbished and so altered as to bring the property to its highest retail-commercial capability.

(2) Redevelopers' Obligations. The land acquired by the City of Chicago will be be disposed of subject to an agreement between the City and the redevelopers. Land disposition and review of redevelopers' plans will consider that:

a. Disposition documents will incorporate provisions for achieving development and design objectives in accordance with the Urban Renewal Plan. The disposition documents shall be drawn up with the advice and assistance of the architectural consultant or other appropriate consultants and an advisory committee, if appointed.

b. Disposition documents will spell out in detail the criteria to be met in order that development and design objectives be achieved.

Offers for parcels to be sold for redevelopment will be reviewed to determine the financial responsibility of the offerors, and to determine their conformance with the plan's design objectives and their compatibility with a regional retail center function.

These redevelopers, their successors, or assignees will be required by contract to observe all provisions of this Urban Renewal Plan, and they will further be required to submit a redevelopment progress schedule satisfactory to the Department of Urban Renewal. It is anticipated that redevelopers will not be permitted to defer the start of the construction for a period longer than that required for the preparation of architectural plans and the clearance of such plans with the City of Chicago in order to determine whether they conform to the Urban Renewal Plan. Generally, this work should be completed within a reasonable period of time (one year). The contract with the redevelopers will also include prohibitions against land speculation.

Other Provisions Necessary to Meet Local Requirements.

A plan for the designated Englewood Conservation Area within which Central Englewood is situated was approved by the City Council on June 15, 1962.

The Central Englewood Urban Renewal Project No. Ill. R-47 is located within the Englewood Conservation Area designated under the provisions of the Urban Community Conservation Act of 1953. The Project is being carried out under the Urban Renewal Consolidation Act of 1961.

Procedures for Changes in Approved Plan.

All amendments and changes in the Urban Renewal Plan, after passage by the City Council of the City of Chicago, will be subject to the same requirements and procedures by which this plan was approved originally.

Tribute Paid to Late Judge Alfred J. Cilella.

Honorable Richard J. Daley, Mayor, on behalf of himself and the other members of the City Council, presented the following proposed resolution:

WHEREAS, The sudden death of Judge Alfred J. Cilella during the summer recess of this City Council shocked and saddened all of us, his former colleagues and friends; and

WHEREAS, Alfred Cilella served as a member of this body from 1951 until 1958 as a representative of the 36th Ward, which he also served as a ward committeeman. In 1958 he was elected Judge of the Circuit Court of Cook County where he served until his death, earning an outstanding reputation, particularly in his work in reorganizing the Family Court and all of the activities connected with that court. He was a serious student of the law. During his many years as a Master in Chancery of the Circuit Court he handled both law and chancery matters as well as many special assignments from the court. He headed and served on many important committees of the Chicago Bar Association giving untiringly of his time and energy to the many matters demanding his attention. He was most highly regarded by both bench and bar and his death is a serious loss to his profession, his constituents and his many friends; now, therefore,

Be It Resolved, That the Mayor and the City Council of the City of Chicago, by this resolution spread upon the record of the proceedings of the City Council of this day, hereby express their deep regret on the passing of Alfred J. Cilella and extend their sincere sympathy to the members of his bereaved family.

On motion of Alderman Massey (seconded by Aldermen Sperling, Campbell, Keane, J. P. Burke, Rosenberg and Marzullo) said proposed resolution was *Adopted,* unanimously, by a rising vote.

In their seconding speeches the Aldermen recalled the zeal with which the late Judge Cilella had performed his duties as Alderman of the 36th Ward; his unstinting contribution of his time and talents for the welfare of Chicago's youth through his participation in Boy Scout activities and the enthusiasm he had shown in his work as the first Chairman of the Youth Commission where his untiring efforts were especially effective; his leadership in securing passage of the ordinance for fluoridation of Chicago's water supply. They concluded their remarks by expressing their sorrow at his sudden death and extending personal sympathy to the bereaved family.

Honorable Richard J. Daley, Mayor, thereupon addressed the Council paying tribute to the memory of the late Judge, not only for his personal integrity but for the fine example he had given his colleagues as a sincere and dedicated public servant. He also extended his personal condolences to the bereaved family.
